

Gearing ratio of 3:1

TURBO ROLLER 3 : 1

The turbo reel is designed to take the effort and time out of moving a portable fence line. The gearing ratio of 3:1 enables faster winding of the wire. Can be used with stranded wire, polywire, tape or rope. The geared reel can also be integrated into the reel system on the left. You simply exchange part number 13041 against 15340. Special feature: Time saving and easy handling.

Part no.	Piece
13041	1

Capacity twine:	According to type up to max 1500m
Capacity tape:	According to width up to max 600m
Wire lead through:	yes
Brake:	yes
